Objective

As a recent computer science graduate, I'm eager to apply my technical expertise and creative vision in a dynamic web or software development role within an innovative organization. Ready to offer fresh insights and drive team success.

Skills & Abilities

Python | Java | HTML | CSS | JavaScript | SQL | MySQL | SQL Alchemy | Django | Flask | Bootstrap | React | GitHub/Git | Version Control | OOP | Debugging | Problem-solving | Collaboration

Projects

OWN MY HOME

Web Application | January 2023 – May 2023

A user-friendly platform merging Zillow-like property search with an Angie's List-inspired directory, streamlining the home buying process and connecting users with essential services effortlessly.

- Collaborated with a team of 5 student developers to build a comprehensive web app using Python, Flask, HTML, CSS, & JavaScript
- Led the end-to-end implementation of the User Component within the SDLC, encompassing account creation, login functionality, and password management features, with dedicated web pages meticulously designed and developed for Sign Up, Login, Password Reset Request, and Password Reset, featuring comprehensive form validation and leveraging white-box testing methodologies.
- Optimized website performance, user experience, and SEO for application success

Work Experience

STITCH FIX

Remote | October 2020 - April 2021

Excelled in resolving a high volume of client inquiries, enhancing workflow processes to boost customer satisfaction and exceed performance goals, while maintaining a 97%+ customer satisfaction rating.
